

**WATERMAN ULTRA LITE NASCAR,
NHRA PRO STOCK BIKES, FORMULA
DRIFT, DRAG & STREET HOT RODS
BRUSHLESS ELECTRIC FUEL PUMPS**

The WRC Ultra Lite Brushless Electric Fuel Pumps are winning all forms of

racing. WRC uses a brushless electric motor with a internal V-5 controller, to use the smallest amount of amps necessary, expand longevity life of pump motor and to eliminate as much weight as possible on the scalloped fuel pump. The complete WRC fuel pump assy. weighs only 1lb. 14oz. While only using 4 to 7 amps with low pressure systems and 6 to 10 amps with Hi pressure systems. The amps required is determined by system pressure and gear size or fuel flow requirements in the system.

2015 NHRA Pro Stock Bike Championship and the top 4 teams in points. Won 10 races for the year and 9 of the last 10 races. Greddy's Formula Drift team placed 2nd in points in the 2015 Formula Drift Series using the NAS200 ULE Fuel Pump.

NAS200 ULE ULTRA LITE BRUSHLESS ELECTRIC FUEL PUMP. COMES IN 150, 200, 250 & 300 GEAR SIZES
